

Welcome to the Softnoise newsletter for May 2015.

This newsletter gives information related to our software and to calculation methods in general. It includes an overview of latest software releases and an overview of events where you can meet us.

CNOSSOS-EU in Predictor-LimA

Softnoise is implementing the European Union's new future mandatory calculation method for strategic noise maps. The new calculation method, which is called commonly called CNOSSOS-EU, will be included in the Standard 7810-G, Plus 7810-A and Advanced 7810-B Predictor-LimA configurations this year.

The current plan of the European Union is to have the official revision of Annex 2 of the European Noise Directive in place in December 2018. This means that in 2022 the European noise maps must be calculated with CNOSSOS-EU for the first time. Many authorities however will start using CNOSSOS-EU earlier in order to compare their 2017 maps with the new method.

Visit our booth in Euronoise and you will get a sneak preview of CNOSSOS-EU in Predictor-LimA

Predictor™ is a Trademark of Brüel & Kjær. LimA™ is a trademark of Stapelfeldt Ingenieurgesellschaft mbH. Predictor-LimA is distributed exclusively by Brüel & Kjær worldwide.

Map Companion, new app for EHS

Map Companion is a new free tablet/phone app for visualization any type of occupational health measurement in workspaces on a digital map. The information gathered with the app can be used directly in the existing mapping and interpolation software MapAtWork. Watch the [promotional video](#).

Map Companion (app)

MapAtWork (pc)

Latest software releases

- » Predictor-LimA V10.1 (B&K Type 7810)
- » NoiseAtWork V4.01 (DGMR Type NAW)
- » MapAtWork V1.11 (DGMR Type MAW)

Events - We look forward meeting you!

- » Euronoise 2015 : 1-3 June, Maastricht
- » Inter-noise 2015 : 9-12 Aug, San Fransisco
